

JPC Bespoke Joinery

JPC Bespoke Joinery

part of JPC Construction (Midlands) Ltd & JPC Doorsets Ltd

Here at JPC Bespoke Joinery we have a long history of working within the commercial joinery sector. We can offer bespoke joinery packages tailored to your required needs. We have the capacity to undertake any size of package from design conception to installed completion.

The company has invested in CNC technology which gives us the capabilities to produce bespoke joinery products to an extremely high standard. Based centrally in Cannock Staffordshire, our 20,000 Sq Ft manufacturing facility is located only 5 minutes from J11 of the M6 and M6 Toll, giving us excellent links to all areas of the country.

We have a dedicated highly skilled workforce, with many years of experience within the joinery sector. Joinery orders are processed initially through our full CAD setting out department. The items will work their way through the factory, eventually onto the bench, where our team of craftsman joiners will construct a product ready for delivery. We have paint shop facilities, which can offer any finish, whether it be paint or lacquer that is required.

What we do

JPC provides bespoke joinery for all sectors of the industry, whether it be education, care, health or commercial office space. We also have many years experience in the restoration of period homes and properties.
